

Arbor

General: An authentic, detailed surface that replicates oak in all its natural character. A blend of beauty and functionality, porcelain tiles are able to bring out the natural appeal of wood and offer inspiration with a strong esthetic compact, offering the benefits of ceramics tiles. Knots, veins, shades and natural marks make the surface extremely realistic. With shades inspired by the different treatments of oak, the wood effect creates welcoming, contemporary atmospheres, leaving nothing to chance. When used on its own, it expresses all its natural character, acquiring intensity and elegance and when combined with stone effects, or combined with concrete surfaces it creates a bold visual impact.

Applications: All commercial & residential applications for both floor and wall, inside & out, including a grip surface R11 for external wet areas. Also in herringbone pattern and 3D for décor areas.
