

# COUVET

**General:** Granite and stone join in this modern composition of porcelain tiles inspired by traditional terrazzo flooring and reinvent in a wide range of formats and finishes. Perfect for floors that need to combine delicateness and resistance in both public and private architectural projects, Couvet's floor proposals are available in Gris, Visión, Arena and Perla. These last two colors are also available in a Deko, faintly recalling a landscape of palm leaves.

**Applications:** Commercial & residential walls and floors
