

CEMENT PROJECT

General: Cement Project is textured cement look porcelain that is elegant and stylish for modern spaces. A versatile collection in which the typically "urban" nature of cement is expressed in a new architectural context. There are 3 textures available in 3 different tones that respond to all design needs.

Applications: Commercial & residential in & out doors, including, facades, foyers, boutiques, galleries, living areas, balconies, patios, kitchens, bathrooms, walls, ceilings and step treads (with lamination and various edge detail finishes being achieved).
